

## **AUTOMATIC HORIZONTAL SMOKE CURTAIN H & HC**

The horizontal smoke curtain H & HC are ideal for protecting large ceiling openings that required a full area closure with extensive drop length against the effects of fire.

## **THE HORIZONTAL FIRE PROTECTION CURTAIN FOR CEILING OPENINGS**

**PRODUCT DATA SHEET | AUTOMATIC HORIZONTAL SMOKE CURTAIN H & HC | FOR CEILING OPENINGS**

**CERTIFICATIONS**

**NFPA 252**  
**ASTM E84 (CAN/ULC-S102)**

Fire resistance: **E 120**  
**2,000 °F/120 min**

**UL-1784, UL-10D, UL 864**

**Smoke Curtain H**

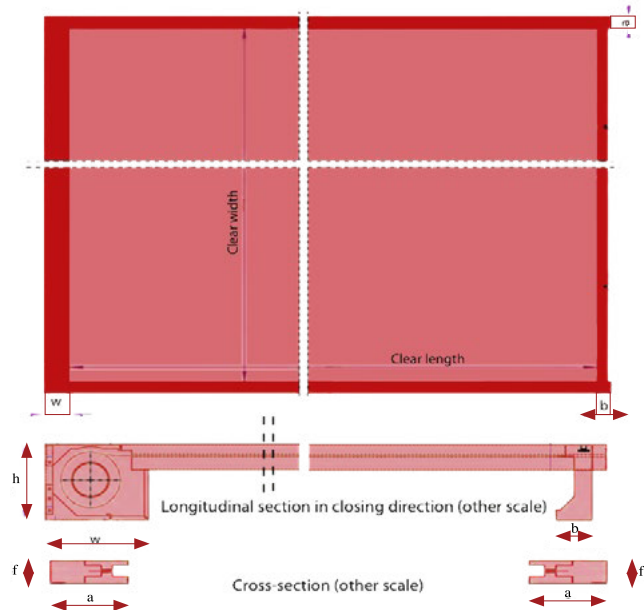

- System for large openings in ceilings up to 66' in width and high drop length
- Tensioning cables in a distance of 5' to support the fabric with large dimensions and the pressure load
- High variability in design (e.g. arch-shaped)
- Safe-closing process up to 17' drop length with gas spring (no auxiliary energy) or with duplex drive system (electrical power supply is required) for drop length up to 30'
- Spring system is closing with fail-safe technology

**Smoke Curtain HC**

- System for large openings in ceilings without supporting or tensioning cables up to 33' x 33' (two-part version up to 33'x 66')
- Housing and bottom bar build a closed casing under operating condition
- Motorized closing and opening (emergency

- 1 Smoke detector
- 2 Casing
- 3 Side guide
- 4 Cloth
- 5 Closing element
- 6 Tubular motor
- 7 Control module
- 8 Control with operating unit
- 9 Manual release

**INSTALLATION OPTIONS**

The system has 2 different mounting possibilities (below the ceiling and in the embrasure)

In the event of an alarm, the system closes using the spring force without requiring an external power source.

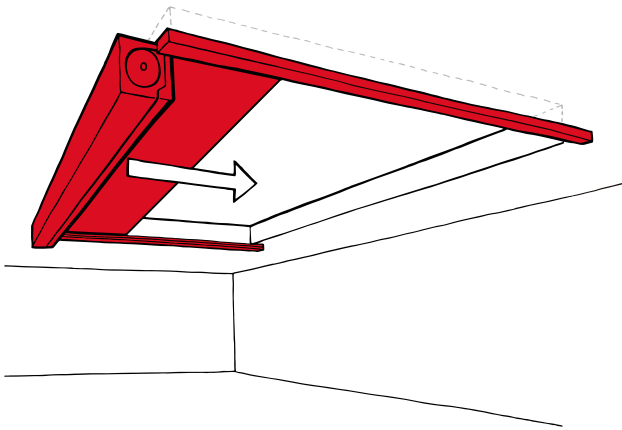

**In ceiling embrasure**

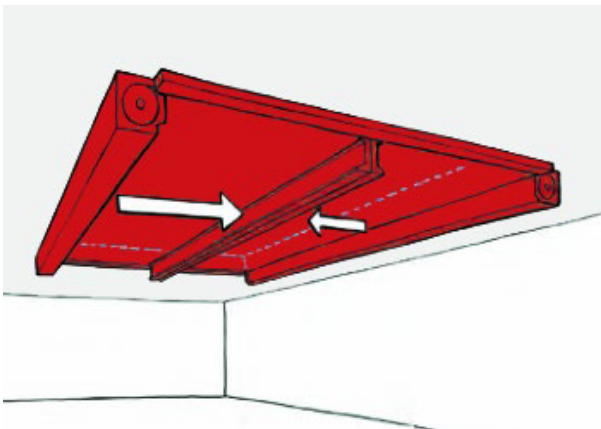

**Below the ceiling**
